

I am writing about the recent proposal to use Low Power FM stations and give them priority over the current FM translator service. I am in opposition to this proposal because K-LOVE is one of two radio stations that I listen to. I listen to talk radio, and K-LOVE (for music) at 91.1 FM. K-LOVE serves our local community by broadcasting positive and encouraging music & messages nationwide including to my local community. The LPFM would eliminate K-LOVE's ability to broadcast in my area and many others around the country. In this day and age, positive and encouraging music is hard to find, and this station does an exceptional job of broadcasting just that to millions of listeners. I listen to KLOVE 91.1 on a daily basis. It would not serve the public interest to switch the priority from the current FM translator service to LPFM and eliminate positive programs such as these. As a concerned citizen, I hope that you will reconsider making a change that would cause our community to lose K-LOVE's encouraging music.

Thank you,

Melissa Roberts
